

# Improved virtual solutions for fully connected patient care

## VirtualCare

**A Virtual Solution That Seamlessly Connects Doctors, Patients & Loved Ones**

VirtualCare goes far beyond standard telehealth video platforms to provide a complete package of virtual care that includes real-time monitoring of vitals and virtual collaboration among all medical professionals in the community.

In our older population especially, patients often have several different health care providers, VirtualCare bring all the patient's information and data together in one place so every approved provider has real-time access. Now doctors can collaborate and view health data, treatment plans, and prescriptions for connected patients. Even caregivers and home aides can remotely view doctors' instructions and treatment plans. Seamlessly connected 24/7.

- **Virtual Front Office**
- **Annual Wellness Visits**
- **Advance Care Planning**
- **Chronic Care Management**
- **Remote Device Monitoring**
- **Behavioral Health Integration**
- **Collaborative Care Model**
